🇮🇳 Indian

Profile

More than a year experienced React Developer with hands-on experience in identifying web-based user interactions along with designing & implementing highly-responsive user interface components by deploying React concepts. Proficient in translating designs & wireframes into high-quality code, and writing application interface code via Javascript and ReactJS workflows. Adept at monitoring & maintaining frontend performance and troubleshooting & debugging the same to bolster overall performance.

- 1+ experience in Software Engineering by leveraging Node, React, Nextjs, Php, HTML, CSS, MUI & Bootstrap.
- Solidity.
- Extensive experience in project execution, requirement gathering, analysis, security, time & cost estimation.
- Adept in end-to-end development of software projects, system designing, security, scalability, coding, debugging, deployment, and version controlling.
- An effective communicator with excellent relationship building & interpersonal skills.

Professional Experience

09/2021 – present	Software Enginner , <i>Imentus technologies</i>	Indore, India
12/2020 – 08/2021	Web Developer , <i>Cubedots</i>	Indore, India

Projects

Sep24 WebApp(Orunpay Product) , FrontEndDevelopment

Sep24 WebApp interact with anchors and wallets interact on behalf of users. This improves user experience by allowing wallets and other clients to interact with anchors directly without the user needing to leave the wallet to go to the anchor's site more .

PolarWin, FrontEndDeveloper

For a US based client, we have created a Trading App based on crypto currency. We used the Apexchart library for graph and cryptocompare API for live data feeds of cryptocurrencies prices. Users can see the history of bidding. Integration with solidity contract. Setting up wallet integration like connect wallet disconnect wallet claim winning tokens and many more .

SellApartmentOnline, Web Developer

We created a webApp where User can Buy 1bhk,2bhk,3bhk flat online based on availability,In webapp user can see the 3D view of the apartment , user can filter apartment according to price,apartment floor and square feet.Use API for data feeds this is also a mobile responsive. Implement video carousel, live filtration and many more

Rimulation, Front end developer

We created a map with the help of open layer map library where user can buy virtual land image tile ,and the image tile of buy land is mint on OpenSea platform.
